LUXURY FIFTH WHEELS

BUILDING CUSTOMER DREAMS

OUR CRAFTSMANSHIP SETS THE STANDARD!

Nothing says craftsmanship like a New Horizons RV. From the custom-built chassis made of American steel, to the handcrafted solid wood cabinetry, New Horizons packs in the quality and we back it up with our “full-timing approved” 2-year hitch to bumper warranty. Our team takes great pride in each and every RV we build, knowing we aren’t just building RVs— we’re building our customers’ dreams!

- Custom-built chassis
- Durable PVC roofing with radiused edges
- Premium electrical system
- Hydraulic leveling system
- Custom all-wood cabinetry
- Ample basement storage
- Large storage tanks
- Hydraulic slide mechanisms
- Full-body paint
- 2-year hitch to bumper warranty

YOUR DREAM RV AWAITS

WE'VE GOT THE MODELS, FLOOR PLANS AND FEATURES TO FIT YOUR RV LIFESTYLE

MAJESTIC

The Majestic represents the pinnacle of quality, comfort and durability in full-time RV living. Using only high-end materials, we handcraft each fully customizable unit from the frame up to accommodate your lifestyle — and to last for the long haul.

Choose from a variety of floor plans and options to create an RV that's uniquely your own. We can design a custom floor plan to meet your heart's desire — from 33 feet to 47 feet and built with up to six slides.

TOY HAULER

At New Horizons RV, our Toy Haulers are built with the same quality and attention to detail as our traditional fifth wheels. With fully insulated and air conditioned garage spaces, you can comfortably use the space for just about anything you desire. Available bunk systems, patio decks and fueling stations are just a few examples of how you can custom equip your Toy Hauler. Garage sizes ranging from 5 feet to 16 feet.

Majestic

EXPERIENCE THE VIEW FROM THE TOP

With New Horizons, the luxury of your RV is limited only by your imagination. When you choose our Majestic model, if you can dream it, we can build it! From the chassis up, the Majestic is customized to accommodate your full-time RV lifestyle and withstand the rigors of the road. With lengths ranging from 33 to 47 feet, each unit features solid wood cabinets and true four-seasons comfort — from -10 to 110 degrees!

Form and function coexist beautifully. Convenient storage abounds with cabinets and deep drawers everywhere. Beds lift to reveal even more storage. You'll be amazed at all the space-saving innovations, and all the little luxuries that make your life in a Majestic more convenient and comfortable.

YOU DREAM IT — WE'LL BUILD IT.

Features available in our Majestic models include standard cedar-lined closet and hamper, 50-inch TV in living area, and a residential stainless steel refrigerator. Some of our most popular upgrades include hand-scraped hickory wood floors, granite countertops, and wine racks.

Pictured is a Majestic bathroom featuring a residential Onyx Collection® shower and optional vessel sink with high-rise faucet.

Our pantry features pull-out shelves and an electrical outlet inside making it a great place to stow kitchen appliances.

TOY HAULERS

ALL THE THRILLS — AND THE COMFORTS!

Hauling your toys doesn't mean you have to sacrifice quality or luxury. Whether you're a motorcycle enthusiast, love hitting the trails on an ATV or dirt bike, or you enjoy hosting parties and entertaining, a New Horizons toy hauler will be the perfect addition to your lifestyle! Our toy haulers can be built with your unique ideas in mind. With garages from 5 to 16 feet deep, we can build the fifth wheel for whatever toys you're hauling — whether it's bicycles, a UTV, golf cart or kayaks — and still have plenty of living space. The garage space can also include extra beds, a dining area, cabinets and more.

Build an RV that's all your own by visiting our website and clicking the "Build & Price Tool." Choose the model, floorplan and options that suit you best and you'll see a preliminary estimate. One of our product specialists will review and provide the best selling price on the model you choose.

NEWHORIZONSRV.COM

Pull-out cargo trays are available in most Summit and Majestic floor plans.

Easy-access basement provides an average of 160 cubic feet of storage.

Solar panels provide economical and environmentally friendly additional power.

We give great attention to detail in our safety-minded approach to electrical wiring.

Firefly Integrations touch-screen panel provides controls for lighting, tank monitors, awning, automatic shades and TV lift.

Optional onboard generator runs on your choice of LP, gasoline or diesel.

Keeping your RV cool doesn't mean listening to a noisy air conditioner anymore. The LG Mini Split is whisper quiet and energy efficient, making it a wonderful addition to any solar system. It "sips" off battery power, providing air-conditioned comfort while off grid or in boondocking situations. Its heat pump capabilities are perfect for those cool autumn and early spring nights and help save on valuable propane.

Wherever you park your RV, you'll never be without constant, consistent hot water with the Truma AquaGo instant water heater. At 60,000 BTU, the AquaGo is the most powerful RV water heater on the market. The AquaGo's burner starts as soon as the hot water faucet is open and flow exceeds 0.4 gallons per minute. The stepless burner control adjusts heater output based on flow and inlet water temperature, maintaining an outlet temperature of approximately 120° F.

Utility center's residential manifold water system includes shut-offs for each fixture, black and gray tank flush-outs and dump valves.

Sturdy and lightweight entry steps stay clean and free of travel damage because they are housed inside the unit during transport.

Revolutionary FlexArmor eliminates roof leaks

With FlexArmor Roofing, you'll never have to reseal your roof again!

Known as the Original Sprayed RV Roof, FlexArmor combines spray polyurea technology with RV construction to create a seamless sprayed RV roof.

Existing caulk is completely stripped and all exterior components removed. A certified technician applies a patented spray that dries in 6 seconds and is three times thicker than typical RV roof material.

Removing caulking joints on an RV roof eliminates the potential for leaks, so FlexArmor Roofing comes with a no-leak transferrable warranty good for the life of the RV. Your roof will never need to be resealed again.

For more information, email Service Coordinator Alysia McCollough at alysia@horizonsrv.com, call 785-238-7575 or schedule an initial inspection.

MORryde protects your RV while you ride in comfort

Smooth out your ride with an upgraded suspension.

Virtually any travel trailer or fifth wheel will benefit from the MORryde Independent Suspension System. It replaces your current axle/leaf spring setup to reduce stress on the frame and protect your trailer from road shock.

The MORryde system provides an enhanced travel experience with smoother towing. Up to 5½" suspension travel results in improved control and handling while reducing vibration over the roughest roads.

Installation of the MORryde Independent Suspension System includes upgrade to disc brakes and computerized alignment.

RV owners should allow approximately four weeks between initial evaluation and installation appointment. Axle replacement and alignment take approximately two days. You may stay in your coach overnight during installation.

THE NEW HORIZONS EXPERIENCE

Our small company produces customized coaches one at a time with a level of quality that production-line units just can't match!

With New Horizons, you purchase directly from the manufacturer and communicate with us throughout production! The process culminates in a three-day orientation, when you live in your RV on site and learn all the ins and outs.
